Re: Letter of Reference for Fan Feng

To Whom It May Concern,

I'm pleased to write a reference letter for Mr. Fan Feng.

Fan currently is the first year PhD student at Department of Mechanical Engineering in the University of Alabama (UA) with a GPA of 4.0. He is advised by myself and has been working as a Graduate Research Assistant in High Performance Building Laboratory since August 2018.

Fan has a Bachelor of Engineering Degree in Architectural Engineering (focusing on Building Energy and Mechanical Systems) from Tongji University. Through his hard work, he has built up a solid background in the area of building and HVAC heat transfer, thermodynamics, modeling, and simulation. Fan is working with me on a U.S. NSF sponsored project of adaptive control of a high performance building fenestration system. I highly appreciate his contributions to the project. He is familiar with building simulation software such as EnergyPlus and Modelica.

As a diligent, passionate, and smart young man who has started to pursue his professional career in building science, Fan will greatly benefit from a summer internship with national labs

Sincerely,

A handwritten signature in black ink that reads "Zheng D. O'Neill".

Zheng D. O'Neill, Ph.D., P.E.
Associate Professor, Dept. of Mechanical Engineering
Adjunct Professor, Architectural Engineering
Assistant Director, Alabama Industrial Assessment Center
